About

After working more than 8 years in client-side programming, I have successfully delivered many different projects: rich, big and small, complex, interesting and awesome web projects for the health-care system, political campaign analytic system, homeowner's maintenance management system and many others. I was a team player both in big and small agile teams. I also have experience working closely with design teams to translate their work into a pixel-perfect web format, while maintaining responsive web design conventions. I actively seek out new technologies and stay up-to-date on industry trends and advancements. Motivated to become a strong software engineer, work-oriented for the result and improve professional skills.

Experience

Helsi

February 2017 - Present

Frontend Team Lead

📄 helsi.me

Ukrainian health-care startup. Key technologies used: React, Redux, Redux Saga, Redux Form.

References

“ Sergey is a great young specialist. One of those who has good knowledge, amazing desire to explore and implement new technologies. I've collaborated with Sergey as product owner and can recommend him as a great front-end developer with huge potential. ”

Sergey Moliavko

“ Sergey is a very innovative developer, who always followed the innovations in the industry and successfully applied them in practice. Self-organized and able to achieve the goals. Very friendly, good team player. It was a pleasure to work with him. ”

Anastasiia Voitova

“ Sergey is highly professional HTML/CSS technician. We worked together on a few extremely challenging projects, that required continuous attention, constant engagement, commitment, and readiness to generate new ideas, and it proved to be an excellent collaboration. Sergey is especially attentive to details and is eager to try out new technologies and approaches, which makes him a great team member and contractor. ”

Anna Mininkova
